

ReferralRooster

Step by Step

ReferralRooster is the smarter, faster way for local businesses to connect, exchange customers, request Google and Yelp reviews, and strengthen the “shop local” economy—while earning real money from your referrals.

Let’s walk through how it works:

Step 1: Create your ReferralRooster account. It’s completely free to join, and you can choose between a free or premium plan depending on how fast you want to grow.

Step 2: Add your business inside your dashboard. Enter your name, address, phone, website, email, category, description, and your Google/Yelp review IDs. You can even customize your review request message. Every business also gets an auto-generated QR code you can share anywhere to share your contact info.

Step 3: After serving a customer, simply open your customer list, add them, and tap to send a Google and/or Yelp review request. Your dashboard shows their name, quick call/text buttons, email, and whether a request was previously sent—making follow-up and review generation effortless.

Step 4: Connect with other local businesses in seconds. Browse or search the business directory, send a connection request, and once approved, you can view their community posts and easily refer customers with a custom note. Premium members also receive instant text alerts whenever they get a new referral.

Step 5: Grow your income by referring other business owners to ReferralRooster! Every owner gets a personal referral code. Track all referrals inside your dashboard. Premium members earn commissions after a referral has been a paid user for 30+ days—and commissions go 10 levels deep when your referrals bring in new premium members, as much as \$15 per paid referral!

Step 6: Earn points that boost your visibility! Loyalty points come from referring customers to other businesses, helping you appear higher in the “Discover Local Businesses” list and climb the leaderboard. Rewards for top point-earners are coming soon!

Step 7: Stay active and get noticed. The more you engage, the easier it is for other businesses to find you and send customers your way. Premium users can also post weekly updates to the community board, but you better check it as posts expire in one week!
